

LED-Tube for meat, fruit applications

- Food looks fresh and appetizing

Special LED Tube with pink color
For meat, sausage, fruit
Makes them look more fresh and appetizing

With the latest LED technology, LeuchTek offers the new and special LED tube for the applications such as meat/ butcher, fruit, vegetable etc food industries.

Advantages:

- Super energy-saving up to 50%
- Extrem long life time, about 40.000 hours
- Reduce the heat generation, better for food and air conditioner
- Cover made from polycarbonat, 100% shatter-resistant

Applications:

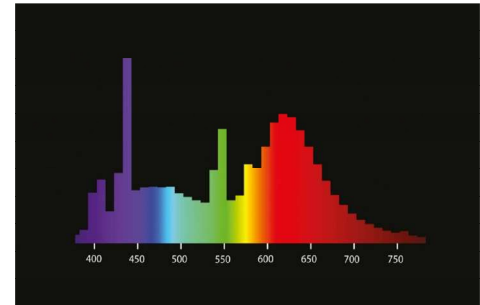

Typically it can be used to replace the special OSRAM „Natura SPLIT Control, color 76“ T8 fluorescent tube.

- Shop with meat, baked food
- Supermarkte with fruit and vegetable
- Laboratories, special plastic and metal industry
- Other Special food industries (DIN 10504)

Good and bright lighting is important for production, working and live. It can not only give the people comfortable feeling, but also help to find the smudgily. In food industry it is critical important that in case the lamp is damaged, the shatter e.g. glass should not pollute the food. It is required by the international standard HACCP, Hazard Analysis and Critical Control Point.

LED tube can meet all such challenges. The cover of LED tube is made of polycarbonat which is impact-resistant. Moreover, it can generate different color and special light. LED is well-known now for energy-saving and long lifetime, too.

Type	Size and Power	Light	Cover	Others
MT8X10	600x26mm, 10W	Special Pink 76 2000K-2500K 610lm	Transparent /Frosted	Lifetime 40.000hrs; PF>0,9; THD>13%; 25pcs/carton
